

Team Name - **Team 17**

Sprint Name - **Sprint 0**

Answer the first three questions before moving on to your action items. There should be at least one item per the first three questions with a minimum of four items total, so at least one question will have more than one answer. In addition to an answer, list which team member contributed that answer. Once complete, move on to your action items, which you should write as a team. Come up with at least two action items.

What went well?

- **Eduardo - We were able to get the UI mockup in time and we were able to agree on a style for the website. Each team member did their assigned tasks and were able to complete our planning deadlines in a timely manner.**

What could have gone better?

- **Carson - We weren't as coordinated as we could have been so we need to communicate more in the next sprint so we can each understand each other.**

What did we learn?

- **Alexander - We learned how to add frames to Framer and how to customize these to make a pleasing UI mockup for a website.**

What are our action items?

- **Luna - We need to begin adding our project files to our github and begin working on the functionality of our website and application.**
